TRANSFORMING PROFESSIONAL
RELATIONSHIPS THROUGH MUSIC

"It's amazing! It creates a feeling of togetherness and underlines the need for listening to each other to co-create something"

"Your work helps to tune in to one another and find a collective vibration"

"It makes it so clear how both diversity AND authority are important in a group"

"People love to participate! I think you have found the secret to inviting them to do just that"

The Artvark experience is a professional workshop for organisations looking to enhance collaboration and teamwork. World-class saxophone quartet Artvark manages to create music that opens the mind and touches the soul. Through their mind-altering performances, Artvark creates space for the new within individuals, as well as between people. Encouraging connection and collaboration; providing space for creation and innovation they bring sheer joy and the urge to act upon it.

Artvark relaxes and opens the mind, creates space for new ideas and stimulates group work.

******* UNISA professor K. Devroop:**

"Not only are they exceptionally well received but they are amongst those very rare artists that 'blow up a storm' at every performance."

******* Dutch Central Banker Henk Korthorst:**

"Artvark stands for multi professional musicians...Absolute teamwork; together, improvising and in close contact with the audience. Musical chemistry that is catching and inspires collaboration."

******* The Daily News Egypt:**

"Dutch act Artvark does not simply play, but performs their music. Literally from the first step, this saxophone-only band was different from all others. The band snapped and tapped on stage, turning their movements and sound into a dance. If it can be said for jazz players: they rocked the house."
